

# Take Control of Your Maintenance Data with Insights

Assessing the performance of your Maintenance Operations can be a guessing game due to limited access to meaningful data. ServusInsights is a game-changing, full-featured analytics engine that gives you the visibility you've been looking for!

## FEATURE SPOTLIGHT

### Custom Property Ops Dashboard

Easy to understand visualizations of your maintenance data. See how your service cycle times and resident feedback scores trend over time and much, much more.

### Service Professional Stats

Get service-stats for both your onstaff & outsourced vendor service professionals. You can even export all your SP stats into a CSV or XLS file for further analysis.

### Resident Feedback

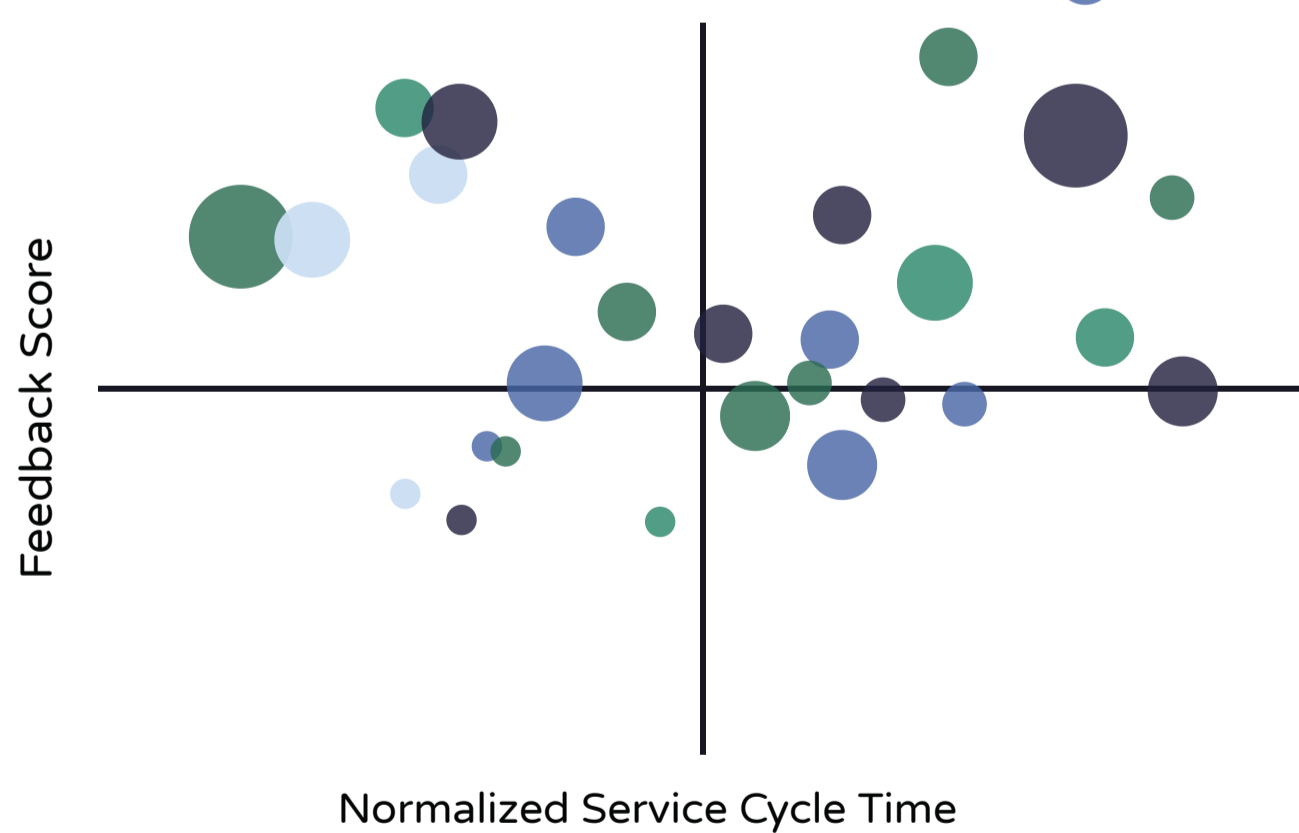

Are your maintenance surveys effective? What regions are performing better than others? Our resident feedback dashboard will help you get to the bottom of it. This dashboard features a great top-down view of survey statistics (open rates, engagement, send rates, etc) that will help you ask the right questions and improve your online property reputation.

### Dashboard Selection & Filters

With pre-configured dashboard options & filtering capabilities in ServusInsights, RM's can easily zoom in and out of their portfolio's maintenance data. Property operations, Make-ready operations, executive summaries, resident feedback, and more. ServusInsights will help you find the needle-in-the-haystack.

Regional Operation Health Chart

### Locations & Categories

Using geo-locations of your units, ServusInsights provides powerful visualizations of where service requests incidents are happening on your property. Use dynamic filtering to isolate specific categories to see where on the map they are happening...maps are a beautiful thing!
